Position at NIVA: Resident Project Coordinator, China

Position at Tsinghua university, China: Visiting professor

Dr Larssen has a Ph.D. in Environmental Chemistry (1999) and has broad experience from studies of effects of pollutants from several countries ranging from field studies and monitoring to modeling. He is Research Scientist at NIVA and also holds a position as adjunct associate professor in environmental chemistry at the University of Oslo. He is currently a professor at Tsinghua University in Beijing. He has been working on different environment related projects in China since 1993. He has been leading large co-operative projects with national and international partners, including a 5 year monitoring project in four Chinese provinces and a project on environmental decision making in China. He is the Norwegian Focal Point in the UNECE work on critical loads mapping and modelling and member of the UNECE Joint Expert Group on Dynamic Modelling.
