

**Prof. Nils Roar Sælthun, Hydrology / Water Resources Management, [nils.saelthun@niva.no](mailto:nils.saelthun@niva.no), tel +47 918 59 909**

Position at NIVA: Senior Researcher

Position at University of Oslo: Department Chiar, Dept of Geosciences

Prof. Sælthun has a M.Sc. in Geophysics (1972) focusing in hydrology and meteorology. He is Research Director, head of the Department for Freshwater Ecology and Technology at NIVA. His main fields of specialisation are in hydrological modelling, flood risk and design floods, predictions in ungauged basins, and impacts of climate change on water resources. He has also worked extensively with water resources management in general, in development and application of information systems in WRM and institutional strengthening. He is teaching hydrology at graduate, postgraduate and technician level, and has long experience in international project co-ordination and management. He has worked in the Nordic countries, the Dominican Republic, Mozambique, Nicaragua, Tanzania, Lesotho, Zambia, the Middle East, Bulgaria, Ukraine and Vietnam.
